Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-5 and 11-13, drawn to a transparent elastomer composition.

Group II, claims 6 and 7, drawn to a process of preparing a transparent elastomer composition.

Group III, claims 8-10 and 14-16, drawn to a molded article.

The inventions listed as Groups I and II and Group III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The Groups, as listed, fail to claim the same or corresponding special technical features. The inventions are not disclosed as being capable of use together and possess different characteristics which have different functions and effects, as well as have different modes of operation. The groupings of claims which would be acceptable to provide a Unity of Invention are those as set out in 37 CFR 1.475(b). Note MPEP 1875.01 in this regard. If applicant elects Group I or Group II, they will be examined together. If elected, Group III would be examined separately.

During a telephone conversation with Abraham J. Rosner on 12 June 2003 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-5 and 11-13; Group II, claims 6 and 7, drawn to a method of preparing the elastomer composition of the Group I claims, will be examined herewith. Affirmation of this election must be made by applicant in replying to this Office action. Claims 8-10

Art Unit: 1711

this election must be made by applicant in replying to this Office action. Claims 8-10 and 14-16 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Specification

The disclosure is objected to because of the following informalities:

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 1711

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 and 11-13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Logothetis et al, newly cited.

The reference to Logothetis et al teaches the identical transparent elastomer composition as herein claimed. Note the Abstract, column 1 (lines 31-40) and column 2 (lines 31-46) for the claimed concept. Further, note the many Examples.

Claims 1, 2, 4-7, 12 and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tung, newly cited.

The patent to Tung teaches the claimed invention at the Abstract, column 1 (lines 16-31) and column 2 (line 48) to column 3 (line 19) for the invention, as claimed.

Claims 1-7 and 11-13 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Okanishi et al, newly cited.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

The reference to Okanishi et al teaches the instant invention at the Abstract, column 3 (line 48) to column 9 (line 55) and the Examples.
